DESCRIPTORS *Auto Mechanics (Occupation); Communication Skills; *Diesel Engines; *Job Analysis; Knowledge Level; Mechanics (Process); *Occupational Information; Safety; Skill Analysis; Skill Development; Skilled Occupations; *Task Analysis; Task Performance; Work Attitudes
IDENTIFIERS *Diesel Truck Mechanics

ABSTRACT

The general purpose of the occupational analysis is to provide workable, basic information dealing with the many and varied duties performed in the diesel truck mechanic occupation. The document opens with a brief introduction followed by a job description. The bulk of the document is presented in table form. Thirteen duties are broken down into a number of tasks and for each task a two-page table is presented, showing on the first page: tools, equipment, materials, objects acted upon; performance knowledge (related also to decisions, cues and errors); safety--hazard; and on the second page: science; math--number systems; and communications (performance modes, examples, and skills and concepts). The duties include maintaining and repairing engines, fuel systems, electrical systems, cooling systems, brake systems, driveline, steering systems, suspension, exhaust systems, hydraulic systems, refrigeration and air conditioning systems, chassis components, and cab and accessories. FOREWARD

The occupational analysis project was conducted by The Instructional Materials Laboratory, Trade and Industrial Education, The Ohio State University in conjunction with the State Department of Education, Division of Vocational Education pursuant to a grant from the U.S. Office of Education.

The Occupational Analysis project was proposed and conducted to train vocational educators in the techniques of making a comprehensive occupational analysis. Instructors were selected from Agriculture, Business, Distributive, Home Economics and Trade and Industrial Education to gain experience in developing analysis documents for sixty-one different occupations. Representatives from Business, Industry, Medicine, and Education were involved with the vocational instructors in conducting the analysis process.

The project was conducted in three phases. Phase one involved the planning and development of the project strategies. The analysis process was based on sound principles of learning and behavior. Phase two was the identification, selection and orientation of all participants. The training and workshop sessions constituted the third phase. Two-week workshops were held during which teams of vocational instructors conducted an analysis of the occupations in which they had employment experience. The instructors were assisted by both occupational consultants and subject matter specialists.

The project resulted in producing one hundred two trained vocational instructors capable of conducting and assisting in a comprehensive analysis of various occupations. Occupational analysis data were generated for sixty-one occupations. The analysis included a statement of the various tasks performed in each occupation. For each task the following items were identified; tools and equipment; procedural knowledge; safety knowledge; concepts and skills of mathematics, science and communication needed for successful performance in the occupation. The analysis data provided a basis for generating instructional materials, course outlines, student performance objectives, criterion measures, as well as identifying specific supporting skills and knowledge in the academic subject areas.

PREFACE

This analyses of the Diesel Truck Mechanic occupation is a basic overview of the job. It includes those tasks basic to a mechanic. No supervisory tasks are included. The analysis in organized by realted task systems.

ACKNOWLEDGMENT

We wish to acknowledge the valuable assistance rendered by the following subject matter specialists. They provided input to the vocational instructors in identifying related skills and concepts of each respective subject matter area and served as training assistants in the analysis process during the two-week workshops.

Job Description

The Truck Diesel Mechanic will perform the duties as a journeyman mechanic:

Maintaining, repairing, dismantling and rebuilding of electric and internal combustion motor vehicles, chassis, trailers and parts thereof, including starting, lighting, ignition, carburator, fuel injection and battery; repairing and adjusting, relining and servicing of brakes; installing radio and vehicle heating and cooling systems: wheel aligning, installing and repairing speedometers, windshield wipers and all other accessories; replacing and repairing of radiators, hoods, pans and fenders, lamps and all machine work and welding in connection with maintenance and repair work; maintaining and repairing bodies and doors, fenders, running boards, seats, body frames, wheels, tires of automobiles and trucks; and towing in disabled vehicles, and other road service work.

10

A Maintaining and Repairing Engines

1 Rebuild Short Block
2 Recondition Cylinder Head
3 Inspect and Service Lube Oil System
4 Assemble Engine
5 Remove and Replace Engine
6 Inspect and Service Blower

11

(TASK STATEMENT) Rebuild Short Block

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit Torque wrench Hone Micrometer Dial boregauge Pullers Cam bearing driver Bearings Gaskets Rings Pistons Seals Liners Timing gears Oil Grease Followers Cam shaft Crankshaft Solvent	Disassemble and clean block Mic all bearing surfaces Inspect liners Remove and replace liners Remove and replace cambearings Install camshaft Install crankshaft with new bearings & seals Inspect pistons and rods Install pistons with new rings & bearings Check clearances Install cam followers Lube parts & assembled Install covers Install vibration damper Install accessory drives	Wear eye protection

DECISIONS	CUES	ERRORS
Determine what engine parts can be re-used Determine what caused problem	Noisy operation Excessive oil use Broken parts	Short engine life

(TASK STATEMENT) Rebuild Short Block

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage (Examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines. Fluids under pressure. (Examples: Incompressibility, transfer of pressure) Behavioral Science See appendix	Set of real numbers: Rationals Uses of numbers without calculations: Ratio Fundamental Operations (Calculations) Basic Measurement Skills and Concepts Instruments: micrometer Geometric Measurement: degrees of angle, volume, length Non-geometric measurement: Oil, R.P.M. Reading and interpreting tables, charts and graphs: specification chart Basic Algebra Skills and Concepts: Uses of variables in formulas Basic Deductive Logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Recondition Cylinder Head

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON		PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit	Solvent	Disassemble head	Wear eye protection
Valve spring compressor	Seals	Clean and inspect head	Use care with grinding stones
Valve reface		Reface valves	
Valve seat grinder		Knurl valve guides or replace	
Knurling tool		Reset cylinder head	
Spring tension tester		Check valve seat position	
Micrometer		Test spring tension	
Dial indicator		Install spring with retainers, keepers and new seals	
Small hole gauge			
Straight edge			
Torque wrench			
Valves			
Springs			
Prussian blue			
Retainers			
Keepers			
Oil			
Grease			
Guides			

DECISIONS	CUES	ERRORS
Determine if valves can be reused	Poor compression Excessive oil use	Short valve life

(TASK STATEMENT) Recondition Cylinder Head

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage. (Examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines Fluids under pressure. (Examples: Incompressibility, transfer of pressure) Behavioral Science See appendix	Set of real numbers: Rationals Uses of numbers without calculations: Ratio Fundamental Operations: (Calculation) Basic Arithmetic Skills and Concepts Estimation: Round off decimals Basic Measurement Skills and Concepts Instruments: Micrometer Geometric Measurement: Length, angles Non-geometric Measurement: Torque, oil Reading and interpreting tables, charts and graphs: specification chart Basic Algebra Skills and Concepts: uses of variables in formulas Basic Deductive Logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT)Inspect and Service Lube Oil Systems

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit Depth Torque wrench Gears Shafts Bushings Lines Float Fittings Filters Pressure relief valve Oil cooler Lube Sealer Solvent	Disassemble and check oil pump Rebuild oil pump Inspect float Test pressure relief valve Test oil cooler for leaks Change filters Inspect lines	Wear eye protection

DECISIONS	CUES	ERRORS
Determine if oil pump needs replaced Determine if oil pressure is correct	Low oil pressure Always rework system when rebuilding engine	Damage to engine

(TASK STATEMENT) Inspect and Service Lube Oil Systems

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage. (examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines Effect of heating and cooling on expansion of materials. (Change of dimensions) Effect of heating and cooling on state of matter (Change of matter from one form to another) Fluids under pressure (examples: Incompressibility, transfer of pressure) Transfer of heat from one body to another Behavioral Science See appendix	Set of real numbers : Rationals Fundamental Operations (Calculation) Basic arithmetic skills and concepts: Ratio Basic measurement skills and concepts Instruments: depth gauge Geometric measurement: Length Non-geometric measurement: torque, liquid, temperature Reading and interpreting tables, charts, and graphs: specification charts Basic deductive logic

COMMUNICATIONS

Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Assemble Engine

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Torque wrench Dial indicator Sealer Gaskets Seals Solvent	Install oil pan Install head Install valve train Install injectors Adjust valves Adjust injectors Install fuel lines Install valve covers Install bell housing Install accessories Install manifolds	Wear eye protection
[illegible]	[illegible]	[illegible]

(TASK STATEMENT) Assemble Engine

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage. (Examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines Fluids under pressure (Examples: Incompressibility, transfer of pressure)	Set of real numbers: Rationals Fundamental Operations (Calculation) Basic measurement skills and concepts Instruments: micrometer Metric and English measure and conversion Geometric measurement: Length Non-geometric measurement: Torque, oils Reading and interpreting tables, charts and graphs: specification charts Basic deductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Remove and Replace Engine

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Hoist Drain pan Engine mounts Clamps Hoses Solvent	Drain oil Drain coolant Remove and replace hood Remove and replace radiator Disconnect lines Disconnect linkages Remove mounts Remove engine Install new engine Hook up all accessories Fill crank case Fill with coolant Use factory recommended start up procedures	Wear eye protection Use proper lifting procedures and points
DECISIONS Determine specifications of particular manufacturer	**CUES** Engine need replaced	**ERRORS** Engine failure

(TASK STATEMENT) Remove and Replace Engine

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage (Examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines Fluids under pressure (Examples: Incompressibility, transfer of pressure) Behavioral Science See appendix	Set of real numbers: Rationals Fundamental operations (Calculations) Basic arithmetic skills and concepts Ratio and proportion: coolant solution Basic measurement skills and concepts Non-geometric measurement: oil, coolant Basic deductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination.
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Inspect and Service Blower

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit Torque wrench Micrometer Hone Seals Bearings Gaskets Rotors Gears Pump drive Solvent	Disassemble and clean blower Inspect rotors Inspect housing Inspect bearings Inspect gears Assemble all parts Check and adjust clearances	Wear eye protection

DECISIONS	CUES	ERRORS
Determine which parts are reuseable Determine what specifications are required	Low blower pressure	Poor engine performance Blower failure

(TASK STATEMENT) Inspect and Service Blower

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage. (Examples: Levers, gears, pulleys) Work input, work output, friction and efficiency in simple machines Effect of heating and cooling on expansion of materials (Change of dimensions) Fluids under pressure (Examples: Incompressibility, transfer of pressure) Centrifugal forces developed by bodies in rotation (Example: Force tending to discharge material from a rotating body) Effects of friction on work processes and product quality Behavioral Science See appendix	Set of real numbers: Rationals Uses of numbers without calculation: Ratio Fundamental operations (Calculation) Basic arithmetic skills and concepts Estimation: round off decimals, guess and check method. Basic measurement skills and concepts: Geometric measurement: length, volume Non-geometric measurement: torque, R.P.M. Reading and interpreting tables, charts and graphs: specification charts Instruments: micrometer Basic deductive logic

(TASK STATEMENT) Inspect and Service Starter and Switches

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Test light Amp meter Lathe Growler Brushes, points Solvent Bushings Solder Solder iron Tape	Test solenoid Test series parallel switch Test starter draw Remove and replace starter Disassemble and clean starter Test armature and fields Turn down commutator Assemble with new brushes and bushings Remove and replace solenoid Recondition solenoid Remove and replace series parallel switch Recondition series parallel switch Check and replace starter drive	Hazard: Finger rings Use proper solvent Safety: Disconnect battery before working on system

DECISIONS	CUES	ERRORS
Determine if starter needs repair Determine if solenoid needs repair Determine if series parallel switch needs repair	Resistance too high Vehicle will not start	Engine will not start Cause problems in other areas

(TASK STATEMENT) Inspect and Service Starter and Switches

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage Resistance of materials to flow of electrical current Behavioral Science See appendix	Set of real numbers: Rationals Fundamental Operations (Calculation) Basic measurement skills and concepts Instruments: volt amp meter Non-geometric measurement: R.P.M., electricity Reading and interpreting tables, charts, and graphs: specification charts

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic (ordering of thoughts and ideas) noise discrimination (recognize proper and improper sounds: animal, human machine)
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Inspect and Service Charging Circuit

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit Alternator-Generator-Regulator tester Test light Ohm meter Diode Tester Growler Lathe Puller Press Brushes Bearings Wires Terminals Solder Solder iron Tape	Test alternator Test generator Test regulator Test wiring Remove and replace generator Remove and replace alternator Remove and replace regulator Disassemble and clean alternator Test rotor, stator, and diodes Disassemble and clean generator Test armature Test field Turn Commutator Assemble alternator and generator with new bearings and brushes Adjust regulator Polarize D.C. regulator Adjust belt tension	Hazard Finger rings-conduct electricity Safety Disconnect battery before working on units a. Cause arcs b. Accidental starting

DECISIONS	CUES	ERRORS
Determine if alternator, generator or regulator is bad Determine if capacity will maintain battery charge	Unit not charging Battery dead Lights dim	Under charge Over charge Destroy battery Down time

(TASK STATEMENT) Inspect and Service Charging Circuit

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage Transfer of energy from one form to another Resistance of materials to flow of electrical current Behavioral Science See appendix	Set of real numbers: Rationals Fundamental operations (Calculation) Basic measurement skills and concepts Instruments: volt amp meter Rate of charge Non geometric measurement: R.P.M., electricity Reading and interpreting tables, charts, and graphs: specification charts Basic algebra skills and concepts Uses of variables in formulas Basic deductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports, terminology
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination
Viewing		Visual analysis, logic, recognition of symbols, codes, emblems

(TASK STATEMENT) Inspect and Service Ignition System

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic Tool Kit Tack-dwell meter Ohm meter Timing light Points and condenser Rotor and cap Wires Plugs Volt meter Cam lube Plug cleaner Distributor Coil Solder Solder iron Tape	Diagnose problems Remove and replace plugs Test plug wire Check rotor Remove and replace points Remove and replace condenser Adjust points Test coil output Set timing Check vacuum advance Check centrifical advance Test primary wire or resistor	Hazard High tension current causes shocks Safety Wear eye protection-sand blaster Make sure vehicle will not start accidentally.
DECISIONS	**CUES**	**ERRORS**
Determine if problem is ignition Determine what part of ignition is at fault	Engine missing Hard starting Regular P.M.	Working on wrong part

(TASK STATEMENT) Inspect and Service Ignition System

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage. Work input, work output, friction and efficiency in simple machines Magnetic fields of force Transfer of energy from one form to another Resistance of materials to flow of electrical current Behavioral Science See Appendix	Set of real numbers: Rationals Fundamental operations (Calculation) Basic measurement skills and concepts Instruments: Tach-dwell meter Metric measurement Non geometric measurement: R.P.M., electricity Reading and interpreting tables, charts and graphs: specification charts Basic deductive logic

J Maintaining and Repairing Hydraulic Systems

1 Service and Repair Hydraulic Pumps
2 Inspect and Repair Hydraulic Lines and Reservoirs
3 Inspect and Repair Hydraulic Control Valves
4 Service and Repair Hydraulic Cylinders

(TASK STATEMENT) Service and Repair Hydraulic Pumps

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Pressure gauge Torque wrench Dial indicator Pipe wrench Micrometer Gears Bearings Gaskets Sealer Oil Seals Solvent	Diagnose problem in pump Remove and replace pump Disassemble and clean Inspect Rebuild pump	Wear eye protection Pull ignition key

DECISIONS	CUES	ERRORS
Determine if pump needs rebuilt Determine if pressure and volume are correct	Leaking oil Slow operation	Pump failure

(TASK STATEMENT) Service and Repair Hydraulic Pumps

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage Work input, work output, friction and efficiency in simple machines Fluids under pressure Transfer of energy from one form to another Relationship of force to distortion in an elastic body Resistance of materials to change in shape Behavioral Science See appendix	Set of real numbers : Rationals Fundamental Operations (Calculation) Basic Measurement Skills and Concepts Instruments: pressure gauge, thickness gauges. Geometric measurement: Length, volume Non-geometric measurement: Pressure, oil, R.P.M. Reading and interpreting tables, charts, and graphs: specification charts Basic algebra skills and concepts Uses of variables in formulas Basic deductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking		Terminology/general vocabulary, clarity of expression, logic
Reading		Comprehension, detail/inference, progress reports
Writing		Penmanship, spelling, reports, terminology/general vocabulary, logic
Listening		Auditory discrimination, logic, noise discrimination
Viewing		Visual analysis, logic, color discrimination, recognition of symbols, codes, emblems

(TASK STATEMENT) Inspect and Repair Hydraulic Lines and Reservoirs

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Pressure gauge Torque wrench Flaring tool Tubing cutter Pipe wrench Lines Hoses Gaskets Fittings Sealer Solvent Oil	Visually inspect lines Remove and replace lines Make up lines Inspect reservoir Remove and replace reservoir Remove and replace filter	Safety Wear eye protection Hazard Fluid under pressure can be dangerous
DECISIONS Determine if lines or hoses need replaced Determine if lines or fittings are leaking	**CUES** Leaking oil Frayed lines Bent tubes	**ERRORS** Line or hose failure

(TASK STATEMENT) Inspect and Repair Hydraulic Lines and Reservoirs

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Simple machines used to gain mechanical advantage Work input, work output, friction and efficiency in simple machines Fluids under pressure Transfer of energy from one form to another Relationship of force to distortion in an elastic body Resistance of materials to change in shape Behavioral Science See appendix	Set of real numbers: Rationals Fundamental Operations (Calculation) Basic measurement skills and concepts Instruments: pressure gauge, thickness gauges Geometric measurement: length, volume Non-geometric measurement: Pressure, oil, R.P.M. (TASK STATEMENT) Service and Repair Hydraulic Cylinders

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Pipe wrench Vise Hone Dial indicator Micrometer Seals Gaskets Packing Rings Piston Sealer	Inspect cylinder Remove and replace cylinder Rebuild cylinder	Safety: Wear eye protection Hazard: Fluid under pressure can be dangerous
DECISIONS Determine if cylinder needs replaced Determine if cylinder can be rebuilt	**CUES** Leaking oil Scored cylinder	**ERRORS** Cylinder failure

(TASK STATEMENT) Service and Repair Hydraulic Cylinders

SCIENCE

Physical Science
Simple machines used to gain mechanical advantage
Work input, work output, friction and efficiency in simple machines
Fluids under pressure
Transfer of energy from one form to another
Relationship of force to distortion in an elastic body
Resistance of materials to change in shape

Behavioral Science
See appendix

MATH – NUMBER SYSTEMS

Set of real numbers: Rationals
Fundamental Operations (Calculation)
Basic Measurement Skills and Concepts
- Instruments: pressure gauge, thickness gauges
- Geometric measurement: Length, volume
- Non-geometric measurement: Pressure, oil, R.P.M.
- Reading and interpreting tables, charts, and graphs: specification charts

Basic algebra skills and concepts
- Uses of variables in formulas

Basic deductive logic

Viewing		Visual analysis, logic, color discrimination, recognition of symbols, codes, emblems

K Maintaining and Repair Transport Refrigeration and Air Conditioning Systems

1 Inspect and Repair Refrigeration Compressor
2 Test and Charge R-12
3 Inspect and Repair Drive Clutch
4 Maintain and Service Auxilary Engine
5 Inspect and Service Condensing Unit
6 Inspect and Service Controlls

(TASK STATEMENT) Inspect and Repair Refrigeration Compressor

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Basic tool kit Dial indicator Torque wrench Puller Press Micrometer Compound pressure gauge Gaskets Bearings Seals Valves Rings Sealer Compressor oil Solvent	Diagnose compressor problems Remove and replace compressor Clean and inspect Rebuild compressor	Safety: wear eye protection, use well ventilated area Hazard: R-12 under pressure, liquid R-12 can cause frost bite

DECISIONS	CUES	ERRORS
Determine if compressor needs rebuilt Determine which parts can be reused	Poor cooling Noisy operation	Load spoilage

(TASK STATEMENT) Inspect and Repair Refrigeration Compressor

SCIENCE	MATH – NUMBER SYSTEMS
Physical Science Effect of heating and cooling on expansion of materials Effect of heating and cooling on state of matter Fluids under pressure Transfer of energy fro one form to another Transfer of heat from one body to another Realtionship of force to distortion in an elastic body Resistance of materials to change in shape Behavioral Science See appendix	Set of real numbers: Rationals Uses of numbers without calculation: Ratio Fundamental Operations (Calculation) Basic measurement skills and concepts Instruments: thermometer Geometric measurement: Volume Non-geometric measurement: Torque, temperature, R. P. M. Reading and interpreting tables, charts and graphs: specification charts Basic deductive logic

BEHAVIORAL SCIENCE

The individual will develop the basic skills and knowledge of the occupation along with the attitudes that will enable him/her to hold a job.

An individual will show professionalism in the following ways:

1. Appropriate personal appearance
2. Friendly cooperative attitude toward co-worker
3. Dependability in carrying out responsibilities
4. Demonstrate initiative in performing duties
5. Demonstrate cooperation in working for group goals
6. Demonstrate an ability to accept correction
7. Develop work habits of cleanliness and neatness

Appendix

Basic Tool Kit

3/8" Drive Socket Set with Drivers

1/4" Drive Socket Set with Drivers

4 Pair Assorted Pliers

Screwdrivers 5 - Straight Blade 4 - Phillips

Hammer

File

Carbon Scraper

Screw Starter

Pick-up Tool

Knife

Punches-5

Chisels-4

Ignition Wrench Set

Test Light

Thickness Gauges

Ruler

Wire Brush

Hack Saw

Allen Wrench Set

Flare Nut Wrenches

Pry Bar

Box End Wrenches 3/8" - 1 1/4"

Open End Wrenches 3/8" - 1 1/4"
